

## DORSET BIRD CLUB

### The Dorset List

The Dorset List is the official list of wild birds recorded in Dorset and is managed by the Dorset Records Panel on behalf of the Dorset Bird Club. It is based on The British List maintained by the British Ornithologists' Union (BOU). The taxonomy follows the latest International Ornithological Congress (IOC) World Bird List.

The Dorset List currently stands at **429** species as of May 2020.

The key indicates the type of records to be submitted for inclusion in the annual Dorset Bird Report:

A	All records
B	Breeding records
C	Counts of roosts, flocks or monthly maxima
D	Dorset rarity (description required, assessed by DRP)
F&L	First and last dates recorded (migrants)
I	All inland records
M	Migration or weather movements
S	All records from May to August
U	Unusual records (albino, behaviour, etc)
W	All winter records
*	National rarity (description required, assessed by BBRC)
